

In the course of continuous product improvement, our Minicoders of the GEL 244 series have been further developed. From now on, we only therefore supply the new GEL 2442 series with improved technical characteristics.

Improved features:

Minimized offset values
Lower power consumption
Enlarged air gap
More robust sensor surface
Alternative cable outlet: radial
Cables with 17-pole connectors fitted(option)

Further advantages:

- The enlarged type code now includes also those versions referenced before by special article numbers.
- Four standard cable length available: 30, 150, 250, 600 cm
- The housing design without step facilitates the integration of the sensor into your system.
(Please observe the modified installation drawing in the enclosure)
- The thickness of the material of the flange has been increased from 3.5 mm to 5 mm (if necessary, use longer screws for fastening).
- The new 2442 series can be used as a direct substitute for the 244 series.
